

Photo#47 First day back after three weeks of rain.

Photo #48 Ron and Polly bail the pit.

Photo #49 A split starts to form along a natural joint in the block.

Photo #50 Splitting in progress.

Photo #51 After splitting of the chunk, excess is removed from the bottom.

Photo #52 A plaster jacket is put on the second block.

Photo #53 Block with two plaster jackets

Photo #54 Turning the smaller jacket.

Photo#55 Wayne Ferstenwerth uses the Hilti drill/hammer that he arranged free use of to pare down the jacket.

Photo #56 The jacket pared down to a lighter weight.

Photo #57. Richard Zack, Ron and two SMU students prepare to carry the jacket out.

Photo #58 The crew takes a rest while carrying the jacket out.

Photo #58 Carrying the jacket down the trail

Photo #60 Into the truck.

Photo #61 After flipping the big jacket, Karen works to pare it down to size.

Photo #62 The jacket further pared down.

Photo#63 Rocky and Karen finish trimming the jacket down.

Photo #64 The jacket with a full plaster coating.

Photo #65 The hole is filled in while the jacket dries.

Photo #66 Wayne brought a wagon to make the haul easier with the big block.

Photo #67 The jacket on its way.

Photo #68 Up a slope.

Photo #69 Down the trail

Photo #70 and in the truck.
